Passion for Homes and Families

THE
ELEGANCE
— PATIO DOOR —

STANDARD FEATURES

- 1. **6" Multi-chambered, fusion welded vinyl frame** will never rot and allows for seamless installation.
- 2. **Operable and fixed panels** are reinforced to maximize structural integrity while also improving security.
- 3. Both panels fully interlock when closed engaging **multiple layers of weatherstripping** for a tightly sealed unit.
- 4. **Dual or triple pane tempered glass options** customize efficiency level.
- 5. **Heavy-Duty rollers** glide on our low-profile monorail track making operation smooth and quiet.
- 6. **Elegant interior and exterior color matched handles** are available with an optional keyed lock.
- 7. **Heavy duty adjustable extruded screen** stays rigid and glides easily in a dedicated track without bending or warping. BetterVue mesh showcases a clearer view.
- 8. **Low-profile threshold** allows for smooth passage.
- 9. Order **left or right operable door** to meet any need.
- 10. **Limited lifetime transferable warranty** includes coverage of all hardware, vinyl, glass, and screen.

PATIO DOOR

ELEGANCE PRO

KD Patio Door

Our Elegance Patio Door is now available with an optional field assembled frame.

Some installation locations are more easily accommodated with a KD door, as the frame is built on site.

IntelliGlass X3	.26	.21	.46

Available with glass packages that meet Energy Star requirements for all regions.

HOW DOES LOW-E GLASS WORK?

Low Emissivity (Low-E) glass is one of the cornerstones of any energy efficient window. Its primary purpose is managing radiation, whether it's solar, light, ultraviolet, or heat. The secret is two or three microscopic layers of silver, which reflect heat back to its source. Other layers in the Low-E coating filter ultraviolet and solar radiation, while allowing visible light through.

Glass packages are filled with either argon or krypton gas in between the panes of glass. Both gases are denser than air, so they make it more difficult for heat or cold to transmit through the glass units. We use high quality sealants, sophisticated filling equipment and a voluntary verification system to ensure consistent glass performance.
