1. **Fusion-welded frame and sash** guarantee that the frames and sashes are always strong and square.
2. **Extra wide, sturdy integral nailing fin** ensures installation ease and inhibits water and air infiltration. **Patented integral j-channel design** provides clean look and saves time and materials.
3. **Advanced balance system** provides smooth operation of sash.
4. **Millwork-look exterior frame design** gives rich detail and style, providing a distinctive millwork-finished look.
5. **5° positive sloped sill** provides water runoff, even in driving rain.
6. **Low profile recessed-in tilt latches** are color matched for a neat appearance.
7. **Soft curved sash design** mimics the look of traditional wood window sashes.
8. **Composite cam lock and keeper** draws sashes closer together for positive lock.
9. **Full length extruded lift rail** ensures seamless and smooth sash operation.
10. **Interlocking meeting rail** provides additional security and has passed AAMA Forced Entry Resistance Test.
11. **3/4" Intercept insulated glass system** is non-conductive and provides a barrier to heat transfer.
12. **Drywall Passthru** allows the fixed sash to be removed so that drywall can be passed into the home after installation.
13. **Optional IntelliGlass Low-E glass with argon fill** provides ultimate thermal performance.
14. **Heavy-duty weatherstrip design with double mylar fins** resists air and water infiltration.
15. **Clear advantage sturdy half screen** provides a much-improved and unobstructed view.
16. **Optional DP-50 rating** is engineered to perform in all types of weather.
17. **Optional jamb extension products** are available in 4-9/16" or 6-9/16" in primed wood, allow the window to easily fit the depth of the opening.
18. **Optional nailing fin removal** (factory or field) to make a single hung replacement.
19. **Lifetime Limited Warranty**
