

vinylmax windows

DP50

Most Vinylmax windows can achieve a DP50 rating with double strength glass

DESIGNED TO WITHSTAND THE ELEMENTS

INDUSTRY LEADING PERFORMANCE

A typical replacement window from a competitor has a DP rating of between 25 to 35. Replacement windows that are made to withstand hurricanes will have a DP rating of 45 or higher.

Design Pressure Rating

- Identifies the load that a product is rated to withstand in its end-use application
- That load is defined as Pounds of pressure per Foot
- A DP Rating must withstand 1.5 times its rating for 10 seconds before suffering permanent damage. DP 50 must withstand 75 pounds of pressure
